Engineering & Services

Field Service
Start up & Commissioning
Application Engineering
Systems Integration
Turnkey Project Management
General Engineering CA Contractor License # 951993

Services & Capabilities

- Factory trained service personnel
- Commissioning and startup technical support
- Technical seminars and training
- Valve and actuator calibration and startup
- Instrument calibration and startup
- Complete turnkey project capabilities
- U.L. 508 custom design
- Project CAD drawings
- PLC Programming
- CFD and modeling

Valve and Automation Solutions

- Severe service valve sizing and selection
- Valve and actuation packages, pneumatic, hydraulic and electric
- Noise and cavitation control
- Total valve management programs
- Damper drives
- Vent to atmosphere and silencers
- Best fit for purpose replacement recommendations
- Ease of operation and life cycle cost considerations

Combustion, Emissions and Steam Solutions

- Low and ultra low NOx burners and burner retrofits
- BMS and CMS system design and hardware
- Custom design SCR Systems
- Burner air fuel mix recalibration
- Pre-emission test and boiler tune-ups
- Heat rate, efficiency studies and plant improvement
- Vapor recovery
- Particulate and CO2 control

Level, Pressure, Flow, and Temperature

- Application assistance
