

Valves & Automation

Durco/Automax/Atomac/Worcester

Valve and automation control solutions for all fluid and slurry processes

Kammer Control Valves

Specialty control valves and actuators engineered for demanding and niche industrial applications

Valtek Control Products

Precision-engineered control valves for industrial service

Global provider of high-integrity valve actuation & flow control solutions

High-performance butterfly valves & check valves for zero leakage solutions

Compact, reliable check valves for every application

Engineered valves for clean, sanitary, and industrial flow

Valve and fluid handling solutions for demanding applications

Severe-service plug butterfly, and check valves built for corrosive and hazardous flow control

Pressure reducing, back pressure, differential, dome-loaded and direct-acting regulators for most fluids and gases

Precision butterfly valves and automation for industrial flow control

High-performance knife gate valves for tough slurry and pulp applications

Engineered valves for power, oil & gas, and industrial steam systems

Valves and valve automation for process industries

Severe service ball valves for the most extreme applications

Pressure Protection

Pressure relief and explosion protection systems

Reliable safety valve solutions for all industrial overpressure protection

Instrumentation

Range of level instruments for boiler trim and filtration solutions

Wide range of level indication and instrumentation for industrial applications

Hygienic and industrial accessories for fluid monitoring applications

Wide range of pressure and temperature instruments for all industries

Combustion, Emissions, Steam

Heavy-duty damper actuators for precise airflow control

Advanced combustion systems and controls for industrial heating

Waste heat recovery systems, industrial high-temperature heat pumps, efficient steam traps

Service & Capabilities

- Factory trained service personnel
- Commissioning and startup technical support
- Technical seminars and training
- Valve and actuator calibration and startup
- Instrument calibration and startup
- Complete turnkey project capabilities
- U.L. 508 custom design
- Project CAD drawings
- PLC programming
- CFD and modeling
- Steam trap & boiler surveys

Engineering Services

- Field service
- Start up & commissioning
- Application engineering
- Systems integration
- Turnkey project management
- General engineering CA
- Contractor license # 951993

Level, Pressure, Flow, and Temperature

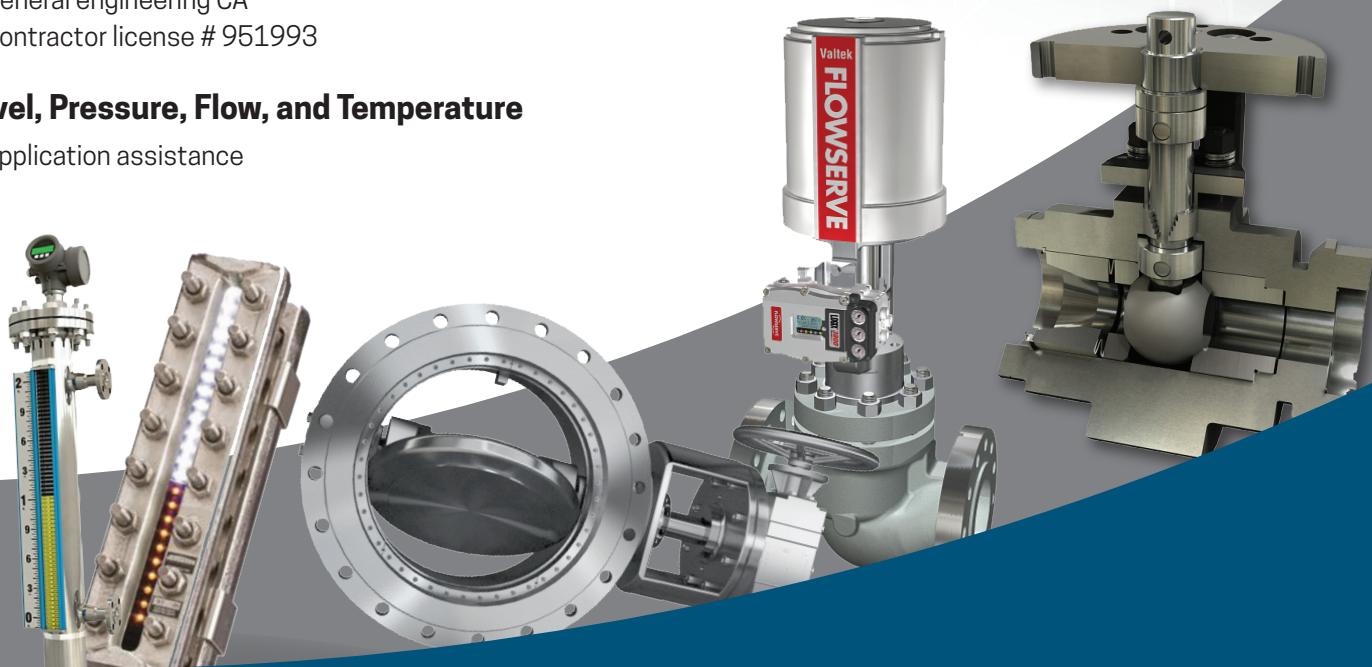

- Application assistance

Valve & Automation

- Severe service valve sizing and selection
- Valve and actuation packages, pneumatic, hydraulic and electric
- Noise and cavitation control
- Total valve management programs
- Damper drives
- Vent to atmosphere and silencers
- Best fit for purpose replacement recommendations
- Ease of operation and life cycle cost considerations

Combustion, Emissions and Steam Solutions

- Low and ultra low NOx burners and burner retrofits
- BMS and CMS system design and hardware
- Custom design SCR systems
- Burner air fuel mix recalibration
- Pre-emission test and boiler tune-ups
- Heat rate, efficiency studies and plant improvement
- Vapor recovery
- Particulate and CO2 control

Process Control and Combustion Solutions for Demanding Industries

Since 1976 CTi Controltech, a premier supplier of valves, valve automation, combustion equipment and instrumentation, has built a strong reputation for providing the industrial, commercial and municipal markets in Northern California and Nevada.
